Software Stack

Core stack

.NET, Blazor, JavaScript, SQL

Front-end

TypeScript, React, Next.js,
Angular, Vue

Back-end and data

ASP.NET Core, Entity Framework,
Node.js, Delphi, MSSQL, PostgreSQL,
MongoDB, Firebase, Supabase

Tools and platforms

Git, Docker, Linux, Grafana k6,
Vercel, Netlify, Hetzner

Core Competencies

- Team player
- Accountable
- Good problem-solving skills
- Genuinely curious
- Effective written and oral communication

Profile

Full-stack software engineer building and maintaining web applications professionally since 2022. I work across user interfaces, backend services, and databases, with a focus on reliable software and practical value for users.

Experience

Full-Stack Software Engineer | Hepra d.o.o.

Feb 2022 - Present | Kranj, Slovenia | Full-time

Building and maintaining “food and beverage” applications for long-term client MXP (MarineXchange). Working in small teams, from feature development through release and production support.

- Built features for POS, ordering, reservation, and fulfillment applications using .NET, Blazor, SQL, and JavaScript. Prepare application builds and manage release versioning.
- Built a central configuration tool from the ground up to production as its main contributor. The application helped replace individual configuration-file edits with one place to manage application settings across a fleet of applications.
- Investigate and resolve production issues with clients and engineering teams to support day-to-day operations.

Professional Cyclist | Adria Mobil Cycling / Slovenian Armed Forces

Jan 2016 – Dec 2021

Competed professionally for six seasons, racing internationally and developing discipline, resilience, teamwork, and attention to performance that I now bring to software engineering.

Aug 2016 – Feb 2020

Employed as a member of the Slovenian Armed Forces sports unit.

Education
